Re: Report & Update Home Quarantine Cases Within Our Estate

Refer to the information of Center Of Health Protection, Department Of Health, we noted that some of our residents are conducting a 14 days quarantine at home after return from mainland or overseas. (see the above table)

Please be advised that the quarantine is a medical surveillance, does not mean any developed relevant symptoms found, and neither suspect nor confirmed cases as well. Instead of over reacted, kindly keep high alertness and maintain personal and home hygiene as usual. By the way we'll strengthen the cleaning and disinfection work of the related building, with extra 2 more days after the quarantine ended.

By the way, we would like to reiterate that we are not informed neither identity nor address of those residents. Thanks for your attention.
